

# Revenue Cycle Analytics

Transform operational and financial information into actionable insights

Improve your revenue cycle. Leverage vast amounts of valuable data to facilitate and validate important revenue cycle decisions. With Experian Health's product workflow and transaction data, paired with industry best-practice metrics from National Association of Healthcare Access Management (NAHAM) and Healthcare Financial Management Association (HFMA), our clients can drive more informed business outcomes.

**Revenue Cycle Analytics** is a web-based business intelligence tool that incorporates existing client data for analytics, as well as non-native standard Electronic Data Interchange (EDI) sets, to focus on key areas such as billing efficiencies, reimbursements and payer performance.

- Break down data silos and gather dozens of data streams into a single thread for reporting and analysis.
- Use informative dashboards and drill-down reports to deliver executive-level comparisons and trending analysis and present opportunities for process improvement.
- Leverage machine learning algorithms for predictive reimbursement.
- Maximize your ROI using Experian Health revenue cycle management products.

**Productivity optimization**

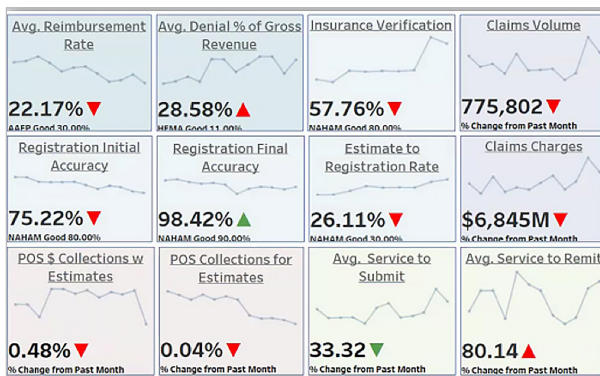

- Ensure optimal use of Experian Health products.
- Get an integrated view of an account across the revenue cycle continuum.

**Benchmarking and KPIs**

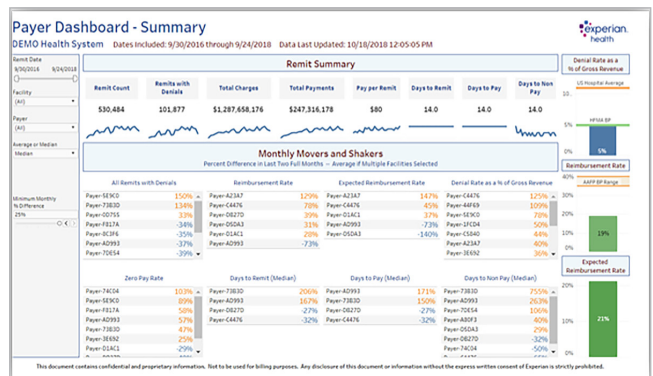

- Determine ROI, increased revenue opportunities or cost savings value tied to KPI's.

**Payer scorecard**

- Receive data-driven answers to the question of how payers are performing against each other for our providers.
- Focus on denied claims, rejections and exceptions.

A holistic executive dashboard shows where revenue cycle KPIs stand and how they are trending over time and across the enterprise.

A payer dashboard facilitates data-driven discussions with payers on effective and efficient reimbursement.
