High-Performance CTV Advertising
From a Hands-On Partner.

The challenge

A regional advertising agency, acting on behalf of an original equipment manufacturer (OEM), wanted to better understand the performance of their connected TV (CTV) automotive marketing campaign.

They wanted to:

-  Evaluate digital and TV campaign performance, attributing actual vehicle sales to the campaign
-  Identify the best performing audience segments or offers, including demographic and psychographic variances among the target audience
-  Evaluate and adjust their marketing strategy based on campaign performance

The solution

The agency initiated a programmatic campaign to reach previous buyers of a specific model in a targeted geographic region. They reached these viewers by leveraging CTV advertising to raise awareness with targeted audience viewers.

In addition, the advertiser used remarketing techniques and other Strategus advertising solutions to re-engage the previously exposed viewers.

Strategus used Experian's OmnImpact for Automotive™ solution to measure the results of the campaign activity.

“Experian’s OmnImpact for Automotive solution allowed us to better understand the results of our advertising, expanding the marketing insights and business intelligence we are able to provide to our clients.”

Joel Cox, Co-Founder:
EVP of Innovation & Strategy

Results

Following the execution of the streaming campaign, the agency wanted to measure their campaign results. Not only did they want to track digital, clickable, activity for the campaign audience, they wanted to understand the audience's offline activity, and ultimate vehicle purchase decision.

Specifically, they wanted to know:

- Did the campaign drive incremental sales for their brand (by make & model)?
- How did the attributed vehicle sales perform vs. their competition?
- How could they fine-tune the campaign execution to further improve their results?

With Experian's OmniImpact for Automotive solution, Strategus was able to attribute vehicle sales to the exposed audience for their client.

They knew if the consumer purchased the intended vehicle.

They knew if the consumer purchased a different vehicle from the targeted dealership locations or the competition.

They knew if and how the demographic and psychographic profile varied amongst vehicle purchasers.

Results

Based on purchase activity as well as demographic and lifestyle differences within the reached targeted audience, Strategus was able to optimize the advertiser's campaign focus and activity to create additional incremental lift to maximize the campaign ROI.

Source: Case Study results were based on an August 2023 Strategus television campaign conducted for an advertising agency on behalf of an OEM. Measurement results were based on vehicle purchases with a 40-day attribution window, ending in September 2023, as measured by the Experian Omnimap for Automotive solution.

**Unexposed are within the target audience but did not receive advertising impressions.*

Some of the key details and findings:

- ✓ The target audience consisted of multiple devices for over 100K households
- ✓ The reached target audience vehicle purchase lift was 133% over the control group's vehicle purchase activity.
- ✓ Furthermore, the exposed target audience also achieved a triple digit lift over the unexposed audience.*

Summary

Experian's OmnImpact for Automotive helped Strategus optimize their campaign focus to maximize ROI.

Challenge

As Strategus executed on marketing campaigns for their clients, one of their biggest challenges was measuring their results and being able to adjust the targeting to maximize their results based on demographic and psychographic insights.

Solution

Experian's OmnImpact for Automotive solution provided competitive intelligence that empowered Strategus and their client with insight regarding the impact of their marketing strategies and campaigns. They objectively measured the return on investment (ROI) of their initiatives to pinpoint which specific campaign targets were successful and where adjustments are needed.

Results

Our OmnImpact for Automotive solution allows Strategus to attribute their client's actual vehicles sales, as well as those of their competition, to advertising activity.

133%

lift for the target audience over the control group

Triple Digit

lift for the target audience over the unexposed audience

Measuring the impact of your CTV advertising against actual vehicle sales

Experian has a unique advantage over other automotive data providers because of the ability to leverage multiple data sources from their in-house statistical credit, vehicle and marketing databases to deliver a level of unmatched intelligence. OmnImpact clients can see trends and act before the competition, giving them the actionable insights and a competitive advantage to make decisions that position them to win in a crowded automotive marketplace.

To find out more about measuring the impact of your advertising against actual vehicle sales, contact your Experian account executive at 888 409 2204, or your Strategus account executive at connect@strategus.com for details on how to get started.
