

I-9 Management

Electronic I-9 Form Upload Feature

Moving to an electronic Form I-9 management system is a key way to increase compliance with federal and state regulations. However, when employers streamline their I-9 management with an electronic solution for new hires going forward, that doesn't solve the problem of prior hires.

Experian Employer Services can help with that! We offer historic I-9 ingestion from previous activity in house or with a third-party to allow employers the ability to maintain history in a single repository.

How It Works

Safe and Easy Transfer

Securely provide imaged I-9 forms, corresponding data file and imaged supporting documents via an SFTP.

Single Location Source

Receive reminder notifications for expiring documents, run management reports and manage retention requirements.

Seamless Upload

Experian Employer Services will process the images and upload them to your account. Our flexible data file layout captures all I-9 data fields with the only required fields being unique ID, first name, last name, employment status and hire date.
